clarus, -a, -um, clear (*both of color and sound, etc.*); *light*

pellūcidus, -a, -um, *transparent (also diaphanus)*

hyalinus, -a, -um, *clear as glass, glassy, clear and greenish (also vitreus or vitricus)*

aqueus, -a, -um, *clear as water, aqueous*

crystallinus, -a, -um, *crystalline, clear as ice*

albus, -a, -um, white

niveus, -a, -um, *snow-white*

candidus, -a, -um, *bright white, radiant white, bleached white > candidissimus*

alabastrinus, -a, -um, *alabaster-white*

marmoreus, -a, -um, *marble-white*

līlāceus, -a, -um, *lily-white (also līlācinus)*

eburneus, -a, -um, *ivory white*

lacteus, -a, -um, *milk(y) white; bluish white (also lacticolor)*

crētāceus, -a, -um, *chalk-white, dull white, greyish white (also calcāreus or gypseus)*

albicāns (*or subalbus, -a, -um*), *whitish, off-white; cream-colored*

albidus, -a, -um, *whitish, dirty-white (also albidulus, albineus, exalbidus)*

dealbātus, -a, -um, *whitened (on a darker ground)*

argillāceus, -a, -um, *(yellowish) clayey-white*

albēscēns, -entis, *verging toward white (from some other color)*

ater ātra ātrum, (pure, lusterless) black; sable; dark; gloomy

anthracinus, -a, -um, *coal-black; black verging on blue*

pullus, -a, -um, *dark, dusky, dull black (also pullātus, which also means “dressed in dark or soiled clothes of mourning, penitence, etc.”)*

piceus, -a, -um, *pitch-black, earthy black, black with a hint of brown*

¹ The ancients, especially the Greeks but also the Romans, gave much more weight to saturation or intensity (“*saturitās*”) than to hue (“*chrōma*”). Thus, since we focus much more on hue, it seems necessary that we view Latin color vocabulary in a somewhat different way in order to express our modern perceptions of color. Therefore colors are categorized here primarily according to hue. To clarify that color and not substance is meant, it is sometimes good to use the adjective together with the word *color* in a descriptive ablative or genitive, as in *stramineo colore* (“straw-colored” and not “made of straw”) or *plumbei coloris* (“lead-colored”). Adjectives in *-color* are frequently invented, as *caelicolor* (“sky-colored, sky-blue”). Also endings like *-āceus* and *-eus* are often added to noun roots to create color adjectives.

Memnonius, -a, -um, *Moorish-black* (also Aethiopicus)

fūlīgineus, -a, -um, *sooty, soot-colored* (also fūlīginōsus)

niger nigra nigrum, (reflective or shiny) black

coracinus, -a, -um, *raven-black, black with a strong lustre*

nigellus, -a, -um, *blackish*

nigrēscēns, *blackish grey* (also nigricāns)

argenteus, -a, -um, silver(y)

glaucus, -a, -um, *(light) grey; bright, gleaming; sparkling* (See also under viridis.)

platineus, -a, -um, *platinum-colored*

cinereus, -a, -um, (ashen) grey

cinerāceus, -a, -um, *ash-greyish (lighter than cinereus)*

cānus, -a, -um, *light grey; hoary* > cānī = *grey hair* (also incānus)

cānēscēns, cānēscentis, *somewhat hoary*

plumbeus, -a, -um, *lead-colored*

chalybeus, -a, -um, *steel-grey*

fūmeus, -a, -um, *smokey-colored* (also fūmōsus)

rāvus, -a, -um, *yellow-grey, greyish yellow (sometimes used to describe the eyes of certain animals)*

rutilus, -a, -um, *fire-red, hot orange (also rutilāns)*

coccineus, -a, -um, *scarlet*

flammeus, -a, -um, *flame-colored, fire-red, vivid scarlet (also igneus)*

miniātus/miniātulus, -a, -um, *vermillion, slightly yellowish-scarlet*

ruber rubra rubrum, *red*

pūniceus, -a, -um, *pure red, “lipstick-red” (also phoeniceus)*

sanguineus, -a, -um, *(dark) blood-red; brownish red (the color of dried blood)*

īnfrāruber, -a, -um, *infrared (Modern Latin)*

roseus, -a, -um, *rose-colored; (rich) pink*

rosāceus, -a, -um, *pink, light pink*

rubicundus, -a, -um, *ruddy; pinkish*

rubidus, -a, -um, *suffused with red, blush-red (also rubeus); reddish, dark-red*

carnōsus, -a, -um, *“flesh-colored” (also carneus and incarnātus)*

colōrēs inter rubrum et caeruleum sed magis in rubrum vergentēs (i.e., reddish “purples”):

purpureus, -a, -um, *crimson; (reddish) purple; (purplish) red (deeply saturated) (also Tyrius,*

ostrīnus, and blatteus. All these words are often translated as “purple” in English but actually signify a crimson perhaps tinged with blue.)

porphyrēticus, -a, -um, *purple-red*

tyrianthinus, -a, -um, *violet-crimson, bluish crimson*

amethystinus, -a, -um, *amethyst, reddish purple (also amethysteus)*

hyacinthinus, -a, -um, *hyacinth, deep lilac*

malvīnus/malvāceus, -a, -um, *mauve (various shades of pale lavender and orchid)*

orchidāceus, -a, -um, *orchid (Late Latin)*

viridis, -e, *(light) green (the color of new leaves)*

flāvovirēns, -entis, *vivid yellowish green (also Late Latin cartūsiānus, i.e., chartreuse; for pale greenish yellow perhaps chlōrus, from Greek)*

thalassinus, -a, -um, *light sea-green*

muscāceus, -a, -um, *moss-green, pale green*

prasinus, -a, -um, *leek-green, dark green (also porrāceus)*

smaragdinus, -a, -um, *emerald-green*

herbāceus, -a, -um, *grass-green* (*also rarely herbeus and grāmineus*)

olīvāceus, -a, -um, *olive-green, dull medium green*

ātrovirēns, -entis, -a, -um, *very dark, blackish green* (*also nigrovirēns if shinier*)

callaīnus, -a, -um, teal, blue-green

aerūginōseus, -a, -um, *verdigris-green, bluish deep green* (*On iron, however, this can refer to rust color.*)

aquamarīnus, -a, -um, *aquamarine* (*Later Latin*)

aquāticus, -a, -um, *aqua*

venetus, -a, -um, *deepest blue-green; deep greenish blue*

lapidis lazulī (color), *lapis, lighter teal* (*Later Latin; also lazulinus*)

turcicus, -a, -um, *turquoise, light greenish blue* (*Late Latin; also turcōsus and turcoīsinus*)

glaucus, -a, -um, *(pale) sea-green, dull bluish green* (*See also under argenteus. This originally Greek word seems to refer more to paleness or, sometimes, brightness rather than to one specific hue. It can also signify a pale or dull yellow.*)

caesius, -a, -um, light blue, sky-blue; blue-grey

cobaltinus, -a, -um, *cobalt, pale blue*

caelestis, -is, -e, *(lighter) sky-blue* (*also caelicolor*)

caeruleus, -a, -um, (deeper) blue, true blue

cūmātilis/cȳmātilis, -e, *sea-blue, the color of ocean waves*

cȳaneus, -a, -um, *dark blue, deep-sea blue, Prussian blue*

venetus, -a, -um, *deepest green-blue; deep blue-green*

cȳanāter, -tra, -trum, *blue-black*

colōrēs inter rubrum et caeruleum sed magis in caeruleum vergentēs (i.e., bluish “purples”)

lavandulāceus, -a, -um, *lavender, light pinkish purple*

violāceus, -a, -um, *(dark) violet; (bluish) purple*

vīnāceus, -a, -um, *grape-colored, (blue-)purple* (*also vīnicolor*)

īanthinus, -a, -um, *violet-blue; blue-violet*

indicus, -a, -um, *dark slightly purplish blue, indigo*

ātroviolāceus, -a, -um, *blackish purple*

ultrāviolāceus, -a, -um, *ultraviolet* (*Modern Latin*)
